Ottawa, Ontario, K1A 0C6 (Canada)

ACKNOWLEDGMENTS

The Centre acknowledges Christiane Hansen and Voyteck Polanski for technical assistance and recording of data; Henry Mucha for assistance in computer programming; Christine Harper for assistance with the telephone survey of goat breeders.

PREFACE

The first National Workshop on Conservation of Animal Germplasm in November 13-14, 1990 recommended that the Research Branch of Agriculture Canada should play a leading role in conservation of animal genetic resources. This came as a result of the Branch's mandate in research, the availability of scientific expertise in genetics and cryopreservation, as well as live animal resources at various locations across Canada.

It was realized that animal genetic resources in Canada should be catalogued by establishing a data bank capable of networking with similar data banks in other organizations and countries. In response to this recommendation, the Centre for Food and Animal Research (CFAR) is therefore assembling inventories of Canada's animal genetic resources.

This publication documents the inventory of Goat Breeds in Canada. It has been prepared with information provided by goat breeders across Canada. We value their willingness to help us in developing this public domain database and catalogue. Only breeders that have provided consent to Agriculture and Agri-Food Canada for the disclosure of their information are shown in this listing. The summary has been prepared from information provided by all breeders surveyed.

Although every attempt was made to contact all goat breeders in Canada, some may have been unintentionally excluded. Breeders that have not been included, such as those that did not complete the questionaire are welcome to participate in future editions. Although, the goat statistics change rapidly with kidding, purchase, sale and mortality the numbers presented can be used as a guideline to establish the status of goat genetic resources in Canada. This information will be useful in developing strategies to prevent the erosion of genetic diversity in domestic animal species and to secure Canada's food and agriculture needs in the future. This inventory would not have been possible without the support of individuals from universities, governments, research centres, commercial breeding establishments, non-governmental organizations and goat breeders across Canada.

Dr. André C. Lachance, Director
Centre for Food and Animal Research

SUMMARY OF GOAT BREEDS IN CANADA 112

ABBREVIATIONS USED IN THIS PUBLICATION

CLRC	Canadian Livestock Records Corporation
ADGA	American Dairy Goat Association
PATLQ	Milk recording program, Québec
A.I.	Artificial insemination
UK	United Kingdom
USA	United States of America
NZ	New Zealand
SA	South Africa
CL	Caseous Lymphadenitis
CAE	Caprine Arteritis Encephalitis

DESCRIPTION OF TERMS

Adult	Goat older than one year of age
Kid	Goat up to one year of age
Availability	Goats for sale
Breeder herd	'Yes' indicates that the farm produces animals for breeding
